

COMPUTER HEADACHES GOT YOU DOWN?

- Your business requires more than one computer? ■ You are constantly fighting 'bugs' and viruses?
- Different versions of the same software application are used by staff? ■ You are concerned about data security?
- Your beleaguered computer support staff is constantly responding to minor breakdowns?
- You lose business because of unexpected computer breakdowns? ■ Software configuration options are confusing?
- You find yourself calling multiple computer resources to resolve the same type of problem?
